Assignment 6

You have been tasked with creating a simple Access database, which resembles the following Parking Permit System. The system will be used for the updating of valid parking permits for a workplace like NUIG or an apartment block:

Table: Vehicles

Student_ID	Vehicle_Model	Registration	Owner	Apartment
00000001	VW Golf	151G1234	Mary Murphy	1
00000002	Ford Mondeo	161D1329	Tom Hynes	4
00000003	Toyota Auris	181MO3432	Alice Daly	10

- Once complete, write a console application that will do the following with this Database:
  - Connect
  - Read
  - Insert
  - Update
  - Disconnect

If you are having any difficulty, then the following tutorial will provide some assistance.
